

NEW

Fixator™ Shoulder Suppression System

CIVCO's enhanced Fixator Shoulder Suppression System features newly redesigned shoulder cups. The improved positioners better capture the shoulders and position them out of the treatment field, especially for small or pediatric patients. New shoulder cups are compatible with the current Fixator, and may be ordered independently.

- Provides 4 indexable choices for lateral positioning, providing options for a variety of patient sizes, from broad shoulders to pediatrics
- Designed to enhance the benefits of CIVCO's Type-S™ system
- Indexed nomenclature for easily-recorded shoulder positioning
- Type-S Head Only IMRT-Reinforced™ Thermoplastic Masks are recommended for use with the Fixator
